

Job Description for Back-end Engineer

About Treebo

Founded in 2015, Treebo is a new age hotel brand offering comfortable stays at budget prices. We are a Tech enabled asset light affordable accommodation brand.

Staying at low-priced hotels has always meant making compromises on quality. One could book online but could hardly avoid the unwelcoming rooms and the indifferent service. Well, not anymore. At Treebo, we are putting dignity back into budget travel with our unmatched 100% Quality Guarantee.

Treebo derives its name from “Bo Tree”, the fig tree under which Gautama Buddha attained enlightenment. The fig tree family - Banyan, Peepul among others - has inspired not just our name but also what we do. We aspire to emulate the vast reach of the fig trees. Starting with Bangalore, we will make sure we are available to serve guests wherever their travels take them. With the same obsession for quality. With the same penchant for conversations.
